The Advanced Majors Program is designed to give high-performing incoming freshmen in College of Science and Mathematics majors the opportunity to enhance their experience at Kennesaw State University!

Students are invited to take part in the program based upon evidence of their previous efforts. Interested students are encouraged to contact the AMP director for more information or to express their interest.

You’ve worked hard to excel at science and math. Let us help foster your future success!

Why should you join the Advanced Majors Program?

A like-minded community
AMP courses are for science and math majors only, so right away you’ll get to know the other students you’ll be taking classes with for your length of time at KSU.

Reserved classes
As an AMP student, you won’t need to worry about not getting a seat in classes! You will receive a guaranteed spot in designated math and science courses designed for AMP students only.

Personalized advising
AMP students have access to professional advisors and faculty to help guide you towards your career goal, whether it’s medical school, working in a research laboratory, or finding a job in the field of your choice.

Dynamic, integrative courses
Complete your degree requirements using innovative lectures, hands-on activities, and creative projects that expose you to the real-world applications of the material you’re learning.

Research opportunities
AMP courses help prepare you to enter into our cutting-edge research laboratories, making you eligible to apply for exclusive research opportunities within the College.

Weekly guest speakers
A variety of seminars, workshops, and special events help you figure out what you want to do with your degree while giving you the chance to receive real-world advice from alumni and seasoned professionals.

At Kennesaw State University, our priority is making sure you’re fully prepared for your future when you graduate. Taking part in the Advanced Majors Program ensures you have the foundational knowledge and critical thinking skills to succeed after graduation.

Workshops, guest speakers, and career events help you determine what you want to do with your degree and the best way to get there, while undergraduate research, internships, and volunteer events give you real-world exposure and invaluable hands-on experience.

You have the talent, and the Advanced Majors Program will help you stand out from the crowd and hit the ground running after graduation.
