In just one evening you could change the lives of countless students who are exploring career possibilities for a science or math degree.

Many students considering STEM (science, technology, engineering and math) degrees think their only career options may be teaching, researching or medical school. Having the chance to meet you and discuss your industry could open up a whole new world of possibilities for many of them.

Please consider joining us on March 20, 2017 for an innovative networking experience guaranteed to be enriching for students and their mentors alike.

You and other mentors will each speak one-on-one with a student for precisely 10 minutes, discussing your industry, what skills are needed, and even your own personal career path. After an hour, you will have spoken with six students total. This exercise will offer STEM students, and those considering STEM, a window into careers they have never thought of and guidance as to how they get there.

Schedule:

6:30 p.m. – 7:00 p.m.            Check-in and refreshments
7:00 p.m.                    Welcome and instructions
