and Biochemistry

Departmental Seminars – Spring 2014

DATE	TIME/PLACE	SPEAKER	TITLE
March 24, 2014	11:00 am – 12:00pm CL 1009	Dr. Keith Hollis Associate Professor of Chemistry Mississippi State University	<i>Designing, Developing and Applying Molecules to Solve Tomorrow's Problems</i> View flyer

College of Science and Mathematics

Department of Chemistry
and Biochemistry

Departmental Seminar Series
Monday, March 24, 2014
CL 1009 from 11:00am – 12:00pm

Dr. Keith Hollis
Associate Professor of Chemistry
Mississippi State University

The Hollis Group designs and develops next-generation organometallic ligands and complexes for many applications, which often requires the development of new synthetic methodologies. Access to new molecules and materials is required to solve many of the technological challenges facing society, such as improving energy-efficiency, direct conversion of solar energy to useful forms, and more cost-effective access to medicines. These goals are reached by developing efficient, scalable syntheses of molecules with interesting properties.
