Discover what’s next in the chemistry of life. Your journey starts here. Kennesaw State University

The Department of Chemistry and Biochemistry

M.S. Degree in Chemical Sciences
Facilities include a 73,000-square-foot, $21 million teaching and research laboratory.

Degree highlights:
- 33-credit hour program
- Thesis-based program with tracks in chemistry and biochemistry
- Competitive stipends and tuition waivers available
- Flexible curriculum tailored to students’ background and research interests

Current research areas:
- analytical chemistry
- astrochemistry
- biochemistry
- chemical biology
- inorganic chemistry
- organic chemistry
- organometallic chemistry
- physical chemistry
- polymer chemistry

Ongoing projects are funded by the National Science Foundation, the National Institutes of Health, the Research Corporation for Scientific Advancement and the Petroleum Research Fund.

Metro Atlanta boasts robust opportunities for employment in both large corporations and small entrepreneurial enterprises, government laboratories, and university research laboratories.
