

2012

SCIENCETALK

a seminar series

September 6, 2012

Secrets of Fish Swimming

Dr. Chui-Jie Wu, Dean and Professor at the School of Aeronautics and Astronautics at Dalian University of Technology, China

Sponsored by the Department of Mathematics and Statistics

September 20, 2012

Regulation of Nitric Oxide Synthase by MAP Kinases

Dr. Jonathan McMurry, Associate Professor of Chemistry at Kennesaw State University

Sponsored by the Department of Chemistry and Biochemistry

October 4, 2012

Must food web models consider adaptive behavior to consider adaptive behavior?

Dr. Antonio Golubski, Assistant Professor of Biology at Kennesaw State University

Sponsored by the Department of Biology and Physics

October 18, 2012

Supercomputing & Computational-intensive problems: Present, Future & its Impact on Society

Dr. Hamid R. Arabnia, Professor of Computer Science at the University of Georgia

Sponsored by the Department of Computer Science

November 1, 2012

Ironing out the RNA World

Dr. Loren Williams, Professor of Chemistry & Biochemistry and Director of NASA-NAI RiboEvo Center at Georgia Institute of Technology

Sponsored by the Department of Chemistry and Biochemistry

November 15, 2012

msSurv, An R Package for Nonparametric Estimation of Multistate Models

Dr. Nicole Ferguson, Assistant Professor of Statistics at Kennesaw State University

Sponsored by the Department of Mathematics and Statistics

**Every Thursday
3:30 - 4:45 pm
Kennesaw State University
Clendenin Building, room 1009 (CL 1009)**

College of Science and Mathematics
