

Ecology, Evolution, Behavior, & Organismal Biology (EEBOB)

Fall 2016 Seminar Series

August 31, 2016

"Jumping Genera: Horizontal gene transfer events underlie ecologically and evolutionarily relevant traits in invertebrates."

[Jennifer Kovacs](#), Spelman College

September 7, 2016

"Optimal Resource Allocation: Theory and Tests in Fish and Crabs."

[Lock Rogers](#), Agnes Scott College

September 14, 2016

"Disease Ecology in Madagascar: lemurs, people, and dogs."

[Sarah Zohdy](#), Auburn University

September 21, 2016

"Natural History of Casebearing Beetles."

[Christopher Brown](#), Georgia Gwinnett

September 28, 2016

"Insane in the Methane: How Microbes Eat and Excrete Greenhouse Gases."

[Jennifer Glass](#), Georgia Institute of Technology

October 5, 2016

"The role of mosquitoes in vector-borne disease transmission."

[Courtney Murdock](#), University of Georgia

October 12, 2016

"Agricultural Activities in Relation to Soil NO_x Emissions on Ambient Air O₃ and NO_x Levels."

[Malinda Gilmore](#), Alabama A&M University

October 19, 2016

"Trends in Conservation Management in Georgia, 2016."

[Malcolm Hodge](#), Stewardship Director for the Nature Conservancy

October 26, 2016

"The influence of physical activity on air pollution exposure and the resulting health effects."

[Roby Greenwald](#), Georgia State University

November 2, 2016

"The Urban Environment as Place: Health Challenges from the Local to National Levels."

[Na'Taki Jelks](#), Agnes Scott College

November 9, 2016

"Symbiosis in marine and terrestrial ecosystems."

[Erika Diaz](#), Emory University

November 16, 2016

"Air quality and health in our cities: Disproportionate impacts."

[Christina Hemphill](#), Georgia State University
