

College of Science and Mathematics

MBIG Seminar - Fall 2015 schedule

Fridays, 1:00 pm - 1:50 pm

Kennesaw Campus in the Clendenin Building, room 1008 (CL 1008)

Date	Speaker	Seminar Title
August 28, 2015	Deserah Strand Michigan State University	<i>"Redox regulation of cyclic electron flow around photosystem I."</i>
September 4, 2015	Tracy Nichols USDA APHIS, National Wildlife Research Center	<i>"Chronic Wasting Disease and the Problem with Prions: The Challenges of an Ante Mortem Diagnostic Assay"</i>
September 11, 2015	David Harrison Vanderbilt	<i>Inflammation, immunity and hypertension. How a protective system goes awry in a common disease"</i>
September 18, 2015	Martin Hudson Kennesaw State University	<i>"Finding novel Kallmann syndrome genes with the help of a worm"</i>
September 25, 2015	Anna Blenda Erskine College	<i>"Genetics and genomics approaches in plant biology research, and beyond"</i>
October 2, 2015	Kimberly Jackson Spelman College	<i>"Licorice Constituent and Androgen Receptor Modulation in Prostate Cancer Therapy"</i>
October 9, 2015	Raquel Lieberman Georgia Institute of Technology	<i>"Structure and misfolding of glaucoma-associated myocilin"</i>
October 16, 2015	Rose Jagus University of Maryland Center for Environmental Science (UMCES)	TBA
October 23, 2015	Carol Chrestensen Kennesaw State University	TBA
October 30, 2015	Deri Morgan Rush University	<i>"HVCN1 in health and disease"</i>
November 6, 2015	Dave Lambeth Emory SOM	TBA
November 13, 2015	Albert Padwa Emory University	<i>"Molecules, Mobiles and Mountains: What do they have in Common"</i>
November 20, 2015	Frank Tulenko Kennesaw State University	<i>"The origin and early evolution of the vertebrate appendicular system: Insights from comparative development"</i>
December 4, 2015	Milton Saier University of California, San Diego (UCSD)	<i>"Mechanisms and Pathways of Evolution: Directed Mutation with a Focus on Molecular Transport"</i>
