Clendenin Building, room 2010 (CL 2010)

Date	Speaker	Seminar Title
January 16, 2015	Dr. Stephen Aller University of Alabama - Birmingham	<i>"Probing a mechanism for correcting the major Cystic Fibrosis defect (F508del): Is there an actual binding pocket?"</i>
January 23, 2015	Dr. Julia Dallman University of Miami	<i>"Two zebrafish autism models of SYNGAP1 and SHANK3 haploinsufficiency converge on common embryonic brain phenotypes"</i>
January 30, 2015	Dr. David Fulton Georgia Regents University	<i>"Regulation of Nox Enzyme Function by Molecular Chaperones. Implications for Inflammation and Cardiovascular Disease"</i>
February 6, 2015	Dr. Brett Berke Yale University	<i>"Activity-Dependent Synaptic Plasticity: Insights from the Drosophila Neuromuscular Junction"</i>
February 13, 2015	Dr. Anton Bryontsev University of New Mexico	NA
February 20, 2015	Dr. Paul O'Connor Georgia Regents University	<i>"Voltage gated proton channels and hypertensive renal injury"</i>
February 27, 2015	Dr. Stephanie Maiden University of Virginia	<i>"The regulation of cadherin-based intercellular adhesions by the actin and microtubule cytoskeletons"</i>
March 6, 2015	Dr. Tsai-Tien Tseng Kennesaw State/Marietta Campus	<i>"Understanding Voltage-gated Ion Channels via Molecular Archaeology"</i>
March 13, 2015	Dr. Jason DeBruyne Morehouse School of Medicine	<i>"Functional screening identifies siah2 as a novel regulator of circadian clock function"</i>
March 20, 2015	Dr. Victor Corces Emory University	NA
March 27, 2015	Dr. Scott Nowak Kennesaw State/Kennesaw Campus	NA
April 3, 2015	Dr. Allen Place University of Maryland Center for Environmental Science	<i>"Some Assembly Required - Multidomain PKS/NRPS genes in dinoflagellates"</i>
April 17, 2015	Dr. Hanjoong Jo Emory University	NA
April 24, 2015	Dr. Keith Giles University of Alabama - Birmingham	NA
