

2014-2015 DISCRETE MATH SEMINAR (DMS)

Wednesday, September 3, 2014

Megan Cream, Emory University

"On Chorded Cycles"

Wednesday, September 17, 2014

Victor Larsen, Emory University

"Density of k -critical graphs"

Thursday, October 2, 2014 – SPECIAL LOCATION

Dr. Ron Gould, Emory University

"On Saturated Graphs"

Thursday, October 16, 2014

Dr. Jennifer Vandenbussche, Southern Polytechnic State University

"A Different Perspective on Completing Partial Colorings: Using Hall's Condition"

Wednesday, October 29, 2014

Dr. Guantao Chen, Georgia State University

"Long Cycles and Spanning Trees in Planar Graphs and Beyond"

Thursday, November 13, 2014

Dr. Peter Johnson, Auburn University

"Some Open Problems Concerning Secure-Domination"

Wednesday, December 3, 2014

Dr. Elliot Krop, Clayton State University

"Advancing toward Bermond's conjecture: How graceful is a lobster?"

Wednesday, January 21, 2015

Songling Shan, Georgia State University

"Homeomorphically irreducible spanning trees and Halin graphs"

Wednesday, April 1, 2015

Dr. John Asplund, Dalton State College

"Decompositions into Paths or Cycles"
